Setting 1: Logistic regression ($n = 500, d = 200$)

Setting 2: Logistic regression ($n = 1000, d = 200$)

Setting 3: Neural network ($n = 500, d = 200$)

Setting 4: Regression trees ($n = 500, d = 40$)

Leave-one-out perturbation $|\hat{f}(x) - \hat{f}^{\setminus i}(x)|$

Leave-one-out perturbation $\frac{|\hat{f}(x) - \hat{f}^{\setminus i}(x)|}{\text{Range}(\mathcal{D}, x)}$
